

How to playback recorded footage on monitor?

Please operate on the local NVR, right click, click "playback" you can see and operate on the below screen:

- 1 Select the target date (the font of the date is green to indicate that there is video on that day, and the white one is no video)
- 2 Select target channel
- 3 Select the type of record
- 4 Click "search" to search for video
- 5 5 and 6 are the searched videos, the green one indicates the alarm video, and the red one is the normal video. You can play it by double-clicking the searched file

NOTE:

- A Playback can be controlled through the playback process bar.

- B You can playback video of channels simultaneously.
 C You can choose viewing mode: by Day or by Hour.
