

## 1. How to connect the device for local surveillance?

**⚠** Please test the camera before installation.

- 1 Connect Cameras to NVR box by CAT5e Ethernet Cable provided..
- 2 Connect a monitor to the NVR via HDMI or VGA port (HDMI and VGA cable not included).
- 3 Connect the mouse to USB port at the rear panel of NVR. You shall then be able to operate on your system with the mouse.
- 4 Connect NVR box to router via Ethernet cable, if you want to view the camera footage remotely.
- 5 Plug the NVR by original power adapter (52V) and turn on power switch, you will be able to watch live stream on the local monitor.
