

### 3. What do the icons on the window mean?

- (1) APP connections: You can see how many users are watching the camera.
- (2) Face detection: This flag lights up when the camera detects a face.
- (3) Human detect: This flag lights up when the camera detects a human body.
- (4) Audio: Connect the headset or TV to the NVR, turn on the speaker and you can hear the sound of the camera.
- (5) Record: This flag lights up when the camera is recording.
- (6) Indicates that the camera is disconnected from the NVR.
- (7) There is no camera configured for this channel.
- (8) After the camera detects the face, it will be displayed on the right side of the screen. If you don't want to show faces, please right click the mouse and click "Face detection".
